(a) after $\alpha \to \alpha/\gamma$, $L \to \gamma L$ ($\alpha L = 400$)
C_v^q, $\gamma = 1$
C_v^{cl}, $\gamma = 1$
C_v^q, $\gamma = 1.5$
C_v^{cl}, $\gamma = 1.5$
C_v/k_B
k_BT ($\hbar = m = k_B = 1$, before stroke $\alpha = 1$)
(b) same curves against $\gamma^2 T$: they coincide
$\gamma^2 k_B T$
